

## EIS V2.0.3

---

### Image Information

---

Version : EIS V2.0.3

Date : 2017/03/29

GZIP: EIS\_V2.0.3\_Ubuntu-14.04\_x86\_64\_3.19\_20170329.img.gz

md5: c04b76e420ec7388c7a4105c2fd39167

Image: EIS\_V2.0.3\_Ubuntu-14.04\_x86\_64\_3.19\_20170329.img

md5: 9b6bc44d8f59e9f9861bc4ebadb59572

---

### Product Information

---

#### Hardward:

Platform: ARK-2121L Intel Celeron 2.0GHz, HDD: 500GB, Memory: 4GB

#### Software:

OS: Ubuntu 14.04 x86\_64 3.19.0-25generic

Docker Engine: 1.12.6

Docker Compose: 1.9.0

---

### NEW FEATURES

---

---

### CHANGES

---

1. API-GW ( Container Service ) : v2.0.3
2. Dust link Manager ( Container Service ) : v2.0.3
3. WSN Simulator ( Container Service ) : v2.0.3
4. WSN development environment ( Container Service ) : v2.0.3
5. WISEAgent : v3.2.18.7104

---

### BUG FIXES

---

\*[4221] 將"advigw-node-red"刪除再安裝後, 原先的 Sample Flow 會消失

- \*[4220] Node-RED HDD-PMQ 頁面的文字誤寫成 HDD PMD
- \*[4219] 將"advigw-mqtt-bus"停止再開啟後, 系統無法收到 Dust-link device 的資料
- \*[4218] 確認 Dust-link device 有連線, 將"advigw-api-gw"或"advigw-mqtt-bus"停止, 在 Hardware Status-> IoTGW 還是可以看到 Dust-link device
- \*[4217] 將 Dust link device 連線後, 移除 dust link device 電源, Node-RED 與 RMM 還是一直顯示 Dust-link SenHub device 有連線
- \*[4216] 系統開機後顯示"System program problem detected"

-----

## NOTES

-----

=====

## EIS V2.0.2

version : EIS V2.0.2

Date : 2017/02/24

GZIP: EIS\_V2.0.2\_Ubuntu-14.04\_x86\_64\_3.19\_20170224.img.gz
